

AlgoAcademy Knowledge Base

Comprehensive list of all possible questions candidates may ask before enrolling, with clear and structured answers.

1. About AlgoAcademy

1.1 What is AlgoAcademy?

AlgoAcademy is a practical, industry-focused learning program designed to help learners master Python, Machine Learning, Generative AI, and Agentic AI through hands-on projects, real-world use cases, and mentor-led sessions.

1.2 Who is AlgoAcademy for?

AlgoAcademy is suitable for: - Students or freshers who want to enter AI/ML roles - Working professionals shifting careers into AI, Data Science, or Automation - Entrepreneurs and founders who want to use AI in their business - Anyone who wants practical, project-based learning instead of theory

1.3 What makes AlgoAcademy different from other institutes?

- 100% practical, no boring slides
 - Real industry projects instead of toy examples
 - Live mentor support
 - Small batch size for personal attention
 - Portfolio-building approach for interview readiness
 - Covers Agentic AI, the latest skill companies look for in 2025
-

2. Course Details

2.1 What is covered in the course?

The course includes: - Python Fundamentals - Data Structures & Algorithms (DSA basics for AI) - Machine Learning - Deep Learning - Natural Language Processing - Generative AI (LLMs, RAG, Fine-tuning) - Agentic AI (Tools, frameworks, automations) - Deployment & APIs - Project portfolio creation

2.2 Is the course beginner-friendly?

Yes. No prior coding experience is required. The course starts from basics and progresses to advanced concepts.

2.3 How many hours is the program?

40–60 hours of intensive hands-on training, depending on the batch.

2.4 What are the tools covered?

- Python
- Jupyter Notebook
- NumPy, Pandas, Matplotlib
- Scikit-learn, TensorFlow/PyTorch
- LangChain, LlamaIndex
- OpenAI, Anthropic, Google Gemini APIs
- Vector databases (FAISS, Pinecone)
- Streamlit / FastAPI
- Git & GitHub

2.5 Is it live or recorded?

Live instructor-led sessions + lifetime access to recordings.

2.6 Do I get assignments?

Yes. Every module has practical assignments, mini-projects, and exercises.

2.7 Do you offer doubt-clearing support?

Yes. Dedicated support via WhatsApp, voice notes, screen sharing, and extra mentor sessions.

3. Projects & Portfolio

3.1 What projects will I build?

You will build: - Python automation project - Web scraping project - Machine learning prediction model - NLP text classifier - RAG-based AI app - Generative AI content engine - Agentic AI automation workflow - One capstone project for interview portfolio

3.2 Will these projects help in interviews?

Yes. The capstone and AI agent project are designed to impress technical HR and hiring managers.

3.3 Will my projects be hosted online?

Yes, you will learn how to deploy your projects using Streamlit, HuggingFace, and other platforms.

4. Eligibility & Requirements

4.1 Do I need prior coding experience?

No.

4.2 Do I need a laptop?

Yes. Minimum requirements: - 8GB RAM (16GB recommended for training deep models) - i5 or Ryzen 5 equivalent preferred - Stable internet

4.3 Is maths required?

Basic school-level math is enough. Complex math is simplified with intuitive explanations.

5. Fees & Enrollment

5.1 What is the course fee?

Fees vary by batch. Most common: ₹10,999.

5.2 Are EMI options available?

Yes. UPI-based EMI or credit card EMIs may be available.

5.3 How do I enroll?

You can enroll by: - Filling the registration form - Making the fee payment - Joining the official WhatsApp group

5.4 Is there a refund policy?

Refund is available only before the first class begins. After the first session, no refund applies.

6. Career Support

6.1 Do you provide placement assistance?

Yes. We offer: - Resume building - AI project portfolio creation - Mock interviews - Referrals where possible - LinkedIn optimization

6.2 Will I get guaranteed placement?

No institute can legally guarantee a job. However, your portfolio significantly boosts your chances.

6.3 What roles can I apply for?

- AI Engineer
 - Machine Learning Engineer
 - Data Analyst
 - Data Scientist (entry-level)
 - LLM/GenAI Developer
 - Automation Engineer
 - AI Product Builder
-

7. Learning Experience

7.1 How many students per batch?

Only 20 students to ensure personal guidance.

7.2 What happens if I miss a class?

Recordings are provided + you can attend the same topic in another batch.

7.3 Do you provide study materials?

Yes. Notes, templates, GitHub repos, and coding notebooks.

7.4 Is the environment friendly for beginners?

Yes. Mentors are patient and simplify all concepts.

8. Technical Questions Candidates Commonly Ask

8.1 What is Generative AI?

Generative AI is a type of AI that creates new content — text, images, audio, video — using advanced models like GPT, Llama, and Gemini.

8.2 What is an AI Agent?

An AI agent is a system that can think, plan, take decisions, and execute tasks using tools, APIs, and workflows.

8.3 What is RAG?

RAG (Retrieval-Augmented Generation) is a technique where AI answers using documents you provide instead of only using its internal knowledge.

8.4 Will I learn fine-tuning?

Yes, basics of fine-tuning and model customization are covered.

9. Batch & Schedule

9.1 What are the class timings?

Evening and weekend batches available. Exact timing varies.

9.2 When is the next batch starting?

Dates are announced regularly. Typical cycle: Every 3–4 weeks.

9.3 Can I switch batches after joining?

Yes, you can switch subject to availability.

10. Certification

10.1 Will I get a certificate?

Yes. A completion certificate is issued after all assignments and projects are submitted.

10.2 Is the certificate industry-recognized?

Yes. The certificate is recognized by partner companies and hiring managers for entry-level AI roles.

11. Real Outcomes

11.1 What results can I expect after completing the course?

- Strong AI/ML foundation
- Project-rich portfolio
- Ability to build AI apps and agents
- Increased chances of AI-related job opportunities
- Practical skills to implement AI in real business

11.2 How soon can I get a job?

Depends on your preparation. Many learners get interview calls within 30–90 days.

12. Other Common Questions

12.1 Can I join from outside India?

Yes. Many students join internationally.

12.2 Is this course suitable for working professionals?

Yes. Sessions are scheduled to suit working timings.

12.3 Do you provide 1:1 mentorship?

Yes, for project guidance and career preparation.

12.4 Is there any age limit?

No. Anyone above 16 can join.

12.5 Can I build my own startup using AI after this course?

Yes. The course teaches AI product building, automations, and deployment.

13. Additional Questions (Extended FAQ)

13.1 Do you provide a certificate of completion?

Yes, a certificate is provided after completing all assignments and projects.

13.2 Will I get support after the course ends?

Yes, you retain access to the community and recordings for future reference.

13.3 Can I take the course while working full-time?

Yes. Sessions are designed to suit working professionals.

13.4 How are doubts resolved during sessions?

Live Q&A, chat support, screen sharing, and additional doubt-clearing calls.

13.5 Will I learn end-to-end AI pipeline development?

Yes, from data collection to deployment.

13.6 Can beginners understand AI and ML concepts easily here?

Yes. Concepts are simplified using real-world examples and analogies.

13.7 Will I get code templates?

Yes. Templates for ML models, RAG apps, AI agents, and more are provided.

13.8 Is there any exam or test at the end?

No exam, but project submissions are required.

13.9 Can I pay in installments?

Yes, EMI options are available depending on payment method.

13.10 Do you provide notes for revision?

Yes. Notes, slides, and cheat sheets are shared.

13.11 Will this course help me switch careers to AI?

Yes, especially with the portfolio and interview prep provided.

13.12 Can I apply for internships after this course?

Yes. Many learners secure internships using their portfolio.

13.13 Will I learn FastAPI for building AI backends?

Yes, backend API development is included.

13.14 Do you teach how to integrate AI into existing business workflows?

Yes. Several modules cover AI automation and integration.

13.15 Will I get hands-on experience with real datasets?

Yes, multiple real-world datasets are used.

13.16 What if I am weak in programming?

No problem. We start from zero and provide extra help.

13.17 Do you help with LinkedIn optimization?

Yes. We help you create an AI-focused professional profile.

13.18 Are classes recorded if I miss them?

Yes, all live sessions are recorded and uploaded.

13.19 Do you teach both theory and practical?

The course is 90% practical and 10% essential theory.

13.20 Can I build a portfolio strong enough for interviews?

Yes, you will create 5–8 real projects + one capstone.
